Skills

- JavaScript | SQL | HTML | CSS | Python | C# | .NET | PostgreSQL| Node | Express | React | Redux
- Postman | Front-end | Back-end | Git | AWS | S3 Bucket | SCRUM | Agile | Time Management

Experience

Prime Digital Academy   Kansas City, MO
Full Stack Software Engineer Student   January 2023 –
July 2023

- Created "YourCannaBuddy" which is an all-in-one tracking app for recreational consumers and medical patients of cannabis, allowing them to track a vast network of products, that can be accessed from anywhere
- Wrote asynchronous requests to databases allowing information to be input and receive data at the same time
- Developed a CRM for "OCD-Diva" an existing business where employees could access information from a survey and provide bids to potential customers
- Coded a reactive survey that changed in real-time while allowing users to input information and then receive bids from employees
- Crafted a movie database platform inspired by Netflix's catalogs that allowed users to keep track of their favorite movies and ones they have recently watched.
- Designed a local weather forecast app built in React.Native that used the National Weather Service API and allowed users to view their weather based on geolocation
- Composed a music album ranking application, influenced by the Letterboxd ranking system, in which users can add new albums based on the year, then rank them based on level of enjoyment
- Coordinated with groups of developers to work on various projects, and inhabiting different roles moving from front end to back end development where needed
- Communicated with clients to make sure the vision of the project was achieved to the level desired
- **Tech** : React, Redux-Saga, PostgreSQL, Node, Express, Material-UI, AWS S3, React.Native,

Crow's Coffee – Red Bridge   Kansas City, MO
Barista   December 2023 – Present*

- Stewarded a fun, safe, and comforting environment for customers and their wide variety of needs
- Created a network of regulars that relied on my expertise to have a reliable experience
- Cooperating with team members and leads to create an environment that was safe, friendly, efficient, while establishing the best possible customer experience

Education

Johnson County Community College   Kansas City, KS
Associate of Arts - AA   August 2020 - January 2021

- Took general education courses and advanced courses in music production
- Worked with other students to develop compositions and songs varying in genre, style, and influence
- Became adept working in programs such as Pro-Tools, Audacity, and Ableton Lite
